# KEY BENEFITS/SERVICES

Mechanical erection of industrial equipment mainly in process industries. Since 1973, Samoco is a full-service mechanical assembly company with multidisciplinary expertise. We provide a wide range of services to companies in need of technical assistance in the assembly, disassembly, and maintenance of factory installations and industrial equipment. Rigging, mechanical works, and lifting go hand-in-hand to provide a one-stop- solution for the client.

With Samoco's extensive experience we are ideally positioned to help our clients in the successful execution of their project. Whether it is the construction of a new plant, installation of new equipment, a turnaround or shutdown, plant expansion, or relocation, we work in close collaboration with our customers so that all maintenance, assembly, heavy lifting, and transport activities required for the project are carried out as efficiently as possible.

We feel at home in all industries that require mechanical and rigging services, but our sweet spot for the equipment erection division is the larger process industry: petrochemical, food processing, metallurgical, waste treatment, pharmaceutical.

## SAFETY

A safety culture prevails throughout the company, from senior management right down to on-site staff, and in everything that we do. Samoco's SCC-P, ISO-9001, ISO-14001 and ISO-45001 certificates guarantee the high quality and safety level in our execution.

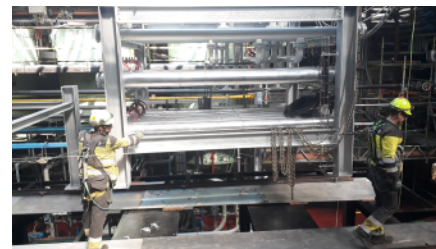

## PROJECTS

Equipment erection at Lanxess Antwerp

Installing equipment at Imerys Willebroek

Installing of modules and steel structure at ABB Ghent

Manipulation and mounting of 18T pipe part in self-engineered chair at Air Liquide Antwerp

Mechanical installation of proton therapy cyclotron and gantries at Aarhus hospital, Denmark

Mounting of a steel structure at Asco Zaventem

**Solve it with skill.**  
**Tackle it with passion.**
