SAMOCO

Since 1973, Samoco is a full-service mechanical assembly company with multidisciplinary expertise.

We provide a wide range of services to companies in need of technical assistance in the assembly, disassembly and maintenance of factory installations and industrial equipment.

Our profound client focus, combined with a skilled, versatile and safety-conscious workforce, is what earns us customer trust. Clients rely on us because they know we continue until the job is done, no matter where or when. We will never let them down.

Samoco is part of the Sarens Group, being able to count on the equipment, expertise and financial standing of one of the leading heavy lifting companies worldwide.

Out of our headquarters in the port of Antwerp, we are able to provide our services worldwide. Our business unit in Slovakia, specialised in mechanical services in the automotive sector, is active in Eastern Europe, Germany and the United States.

OUR AREAS OF EXPERTISE

THE QUALITY OF OUR PEOPLE IS THE CORNERSTONE OF OUR ABILITY TO SERVE OUR CLIENTS.

Equipment Erection

Mechanical erection of industrial equipment mainly in process industries. Whether installing hundreds of new machines during a greenfield project, replacing equipment during a shutdown, or handling a single piece of equipment which is difficult to access in the plant - we are the specialists to go to. Rigging, mechanical works, and lifting go hand-in-hand to provide a one-stop-solution for the client.

Industrial Moving

From a single machinery removal or installation to the installation of an entire factory and/or machinery relocation from one continent to another, we can provide it all to fulfil the needs of the client. The client can count on our versatile and experienced teams, backed by a wide range of lifting and handling systems such as electrical pick and carry cranes, hydraulic gantries, self-propelled trolleys, and jacking systems.

Mechanical Maintenance on Port and Overhead Cranes

We have a team of specialised technicians with extensive experience in reconditioning, repairing, and maintaining port and overhead cranes. Given that the unanticipated stoppage of loading and offloading activities can quickly add up to a great deal of money, they know exactly what a 'rapid response time' means.

Bundle Pulling

With a wide range of bundle pulling and lifting equipment in our fleet we can maneuver bundles up to 2000mm in diameter and weighing up to 45T. In addition to pulling the bundles we are also able to open and close the heat exchangers, lift and transport the bundles to and from the cleaning area, and perform the pressure testing.

Automotive Services

Our branch in Slovakia has extensive expertise in moving and installing production lines in the automotive sector throughout Europe and the US. This includes support for mechanical and electrical installation as well as the execution of turnkey projects including the manipulation of heavy equipment such as presses with hydraulic gantries.

OUR EQUIPMENT

INVESTING IN OUR OWN LIFTING AND SHIFTING EQUIPMENT MAKES US ABLE TO STAND OUT FROM OUR COMPETITION.

HYDRAULIC CRANES
25T - 130T

ELECTRICAL PICK & CARRY CRANES
3T - 60T

HYDRAULIC GANTRIES
200T - 800T

JACKING SYSTEMS
IN VARIOUS CAPACITIES

SELF-PROPELLED TROLLEYS
UP TO 80T

SARENS GROUP EQUIPMENT: CRANES, BARGES,
SPMT'S, SKIDDING AND JACKING EQUIPMENT

SHEQ | Safety, Health, Environment, Quality

WE ARE COMMITTED TO THE WELL-BEING AND PROTECTION OF HUMAN LIFE, ENVIRONMENTAL DUTY OF CARE, PROTECTION OF ASSETS AND CUSTOMER SATISFACTION.

A safety culture prevails throughout the company from the senior management to the on-site staff and in everything we do. Samoco's SCC-P, ISO-9001, ISO-14001, and ISO-45001 certificates guarantee the high quality and safety level in our execution.

At Samoco, all of our projects are being executed along a standardised procedure, called the Samoco Project Management or "SPM" methodology. From the creation of the bid until the evaluation of the project, all necessary phases are defined along with the most important milestones. This gives the organisation the necessary grip and control on the process.

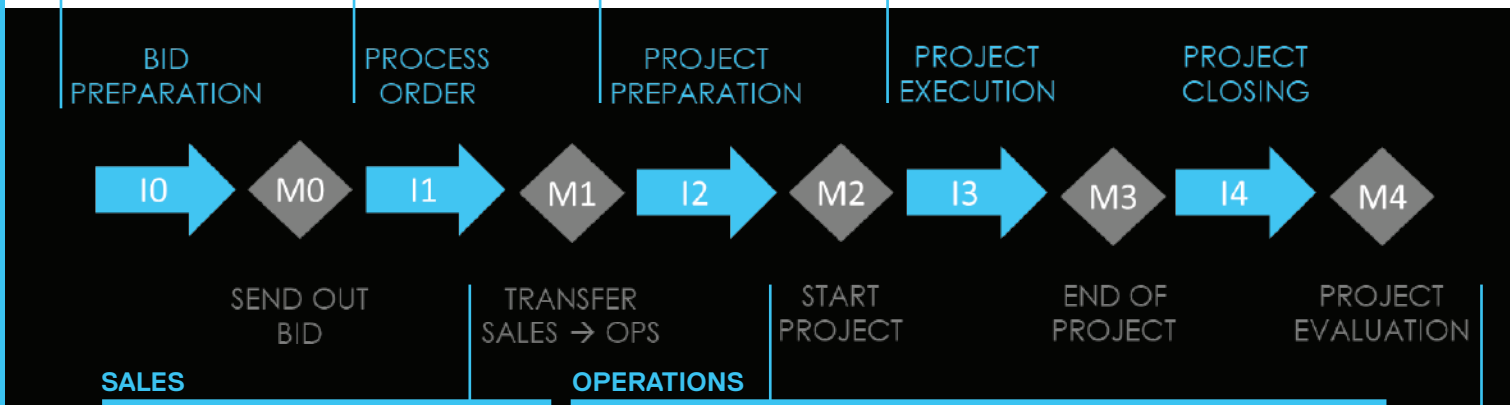

Involvement of SHEQ department in Bid Phase detailed analysis of client safety & quality requirements / Investigate local rules and regulations

Sound risk management resulting in balanced T&C's / Tie up loose ends have a clear agreement on all topics

Development of project safety plan (based on plan from client) / Assistance in preparation: certificates, site inductions, client specific requirements / Kick-off meeting with SHEQ team client

Presence of Safety officer according to agreement / WPI & toolboxes / Safety attitude observations / Rewarding stop reflexes / Project audits / Incident investigations + action plans / Frequent management presence on site

SHEQ INVOLVEMENT DURING PROJECT LIFECYCLE

SHEQ team present during handover Discussion on SHEQ deliverables and timelines

Kick-off on site / Samoco start work presentation / Facilitate site access and induction

Internal evaluation of the project with site team and support services / Internal evaluation of manpower present on site / External evaluation with client team to develop lessons learned

Living by these guidelines have not only provided us with excellent safety statistics but also earned us a number of important awards that are recognised throughout the industry:

Belgian Health & Safety Manager of the year 2020 award (Agoria)

Covestro Safety award 2018

BASF Safety award 2018 & 2019

OUR TEAM

WE ARE POWERED BY KNOWLEDGE AND EXPERIENCED IN EVERY INDUSTRY WE SERVE.

Working in an efficient and result-oriented manner is only possible when you have a dedicated and ambitious team. At Samoco the management team plays an active role in leading the team on a day-to-day basis and with the support of a workforce of 150 committed and qualified people we are fully prepared to successfully complete every project we tackle.
